

Table 1. Risk factors for venous thromboembolism

Acquired	Inherited
Age >50	Factor V Leiden
Surgery	Prothrombin gene mutation (G20210A)
Trauma	Antithrombin deficiency
Immobility	Protein C deficiency
Cancer	Protein S deficiency
Estrogens, exogenous	Elevated factors VIII or XI
APAS	MTHFR abnormalities

APAS = antiphospholipid antibody syndrome; MTHFR = methyltetrahydrofolate reductase.
